

Scientific Method

Name: _____

In the Observation column, write about the thing you have observed and want to test. In the Hypothesis column, write a theory to explain the events you observed. In the Experiment column, describe the steps and materials you will use to test the hypothesis. In the Predictions column, write what you think will happen. In the Conclusion column, write a summary of what happened during the experiment and whether the hypothesis was true or false.

Observation	Hypothesis	Prediction	Experiment	Conclusion
